# Zahra Rahnama

Laravel Developer  
Istanbul, Türkiye

## Summary

Laravel developer with strong experience in backend development, API design, and building scalable SaaS architectures. Skilled in writing clean, optimized code, applying software design patterns (such as Strategy Pattern), and working with relational databases. Passionate about solving complex backend challenges and continuously improving system performance. Always eager to learn, grow, and collaborate with innovative development teams.

## Experience

AustroByte GmbH  
Back End Developer  
May 2025 - Present (7 months)  
Salzburg, Austria

Working in a data-driven SaaS company, developing scalable Laravel modules, optimizing APIs, and enhancing backend performance.

ModiranToseWeb  
Back End Developer  
July 2024 - February 2025 (8 months)  
Razavi Khorasan, Iran

Optimized API performance following SOLID and Clean Code principles.  
Designed scalable architecture using the Repository–Service pattern.  
Applied linting tools to prevent common coding issues during development.  
Created structured API documentation using Swagger YAML.  
Refactored logic to improve maintainability.  
Implemented Job/Queue systems and built a Workflow Service for internal processes.

Journey  
Back End Developer  
January 2024 - July 2024 (7 months)  
Qom, Qom Province, Iran

Developed secure RESTful APIs using Laravel and documented them with Swagger.

Implemented SSO and enterprise login systems for partner organizations.

Followed Git Flow and participated in code reviews and pull requests.

Added automated tests to improve stability and prevent regressions.

Integrated Zarinpal for wallet & payment features.

Designed database structures and implemented webhooks for communication with external systems.

Improved media security and download-protection using Aarvan Cloud.

#### ModernHost

##### Laravel Developer

October 2022 - December 2023 (1 year 3 months)

Qom, Qom Province, Iran

Started backend development using Laravel (MVC architecture).

Built the admin panel (Blade + Laravel) including both front-end templates and backend logic.

Designed and implemented MySQL database structures based on project needs.

Contributed to building a scalable backend foundation and assisted in deployment and Git versioning.

---

## Education

### Qom national university of skill

Bachelor's degree, Computer Engineering · (December 2015 - December 2018)

### Shariaty Technical and Vocational University

Associate's degree, Computer Engineering · (September 2013 - December 2015)
